Ever wonder what happens to the plastic you throw away?

Join us for an engaging and accessible talk about microplastics—the tiny plastic particles showing up in our oceans, our food, and even the air we breathe. You'll learn where they come from, why they matter, and what we can all do to reduce their impact.

Micro Plastics

Perfect for anyone curious about the environment and looking to make a difference, this talk breaks down the science in a way that's easy to understand and impossible to ignore.

**July 16, 2025
